The essence of nature in expert hands.

### BEGO IMPLANT SYSTEMS

#### naturesQue ColTect P

Assuming that the clinical requirements for a barrier membrane are satisfied, individual preferences for the handling properties play a major role in the choice of collagen membrane. The easy handling of naturesQue ColTect P enables diverse applications in therapeutic concepts that include the use of regenerative measures.

#### The properties of naturesQue ColTect P

##### Structure, design, and stability

- Produced from porcine peritoneum
- Stabilization of collagen fibers using minimal crosslinking prevents premature enzymatic cleavage of the collagen fibers
- Reproducible barrier function (12–16 weeks)

##### Handling and feel

- Membrane can be applied wet or dry
- Feel when dry: Stable and rigid, sturdy
- Feel and properties when wetted: Can be draped, sturdy, adhesive, not sticky, can be repositioned
- Not side specific
- Can be fixed with pins
